FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

FCC Chairman William Kennard
Federal Communications Commission
1919 M Street, N.W.
Washington, D.C. 20554

Dear Mr. Kennard,

Please, in your consideration of RM-9242, keep in mind that power levels should be allowed such that LPFM stations will be commercially viable entities. I would hope that 3KW is the upper boundary, providing for a 10-15 mile range and thus allowing the station to attract advertisers.

Also, supporters of RM-9242 such as myself would like to see a NPRM and NOT an NOI soon please.

Thank you,
